

# Record and broadcast microscopy imaging

---

We produce optical systems and software that digitize your medical microscope or slit lamp and allow for seamless capturing, storing, and broadcasting of high-quality medical imaging - **without blocking the binoculars.**

# MicroREC

Custom Surgical®

## Digitize your microscope

MicroREC allows you to attach any smartphone to a microscope or slit lamp and start capturing medical imagery instantly.

Works with 90%  
microscopes  
and slit lamps

Compatible  
with any  
smartphone

Produced in  
Germany

2-year  
warranty

Worldwide  
shipping &  
support

High-quality  
German  
length

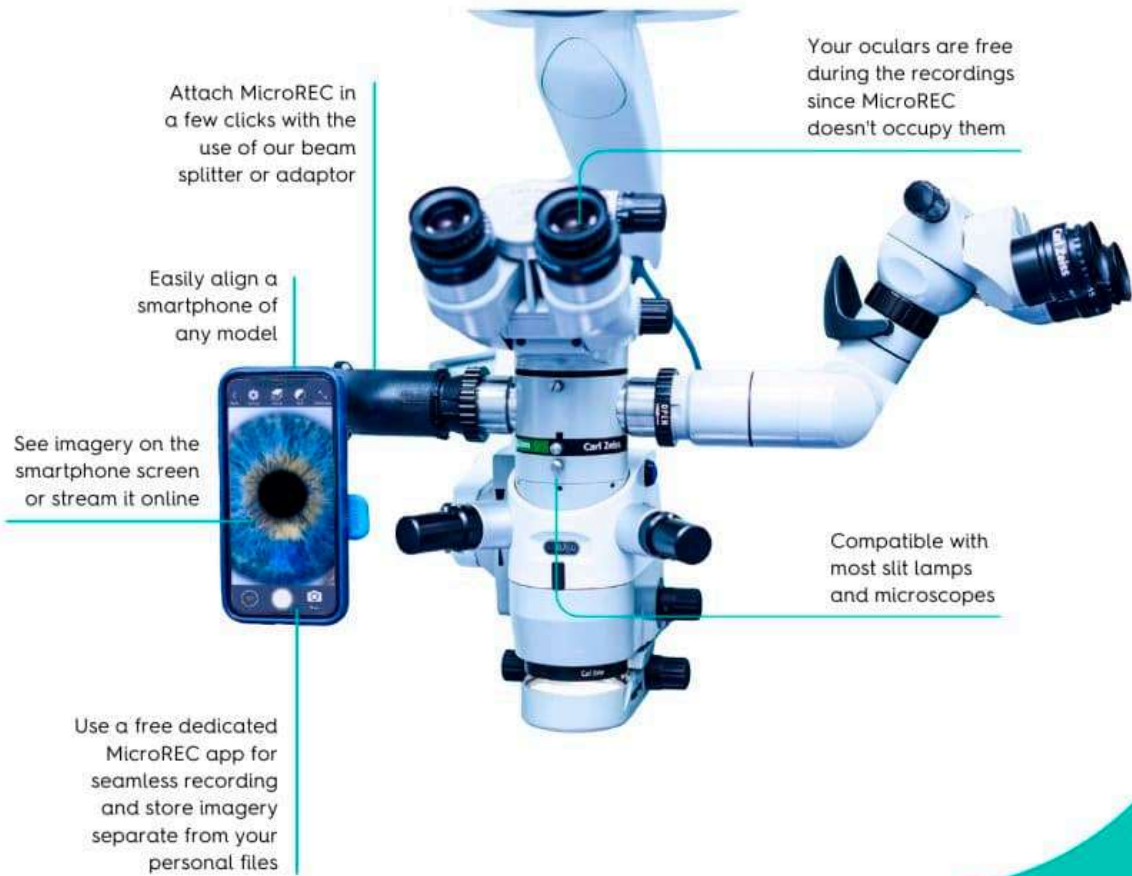

## Broadcast microscopy imagery

With MicroREC, you can store medical imagery but also publish it online or broadcast live to larger screens. It can also enable telemedicine and remote patient care when a doctor can watch surgery live and assist in it.

# MicroREC

Custom Surgical®

MicroREC is available for purchase worldwide, through distributors or our website [customsurgical.co](https://www.customsurgical.co)

## The free MicroREC app for medical imagery

Capture microscopy and slit lamp imagery with ease. The MicroREC app allows you to adjust camera settings to operating room conditions, shoot and store content in a dedicated gallery separately from your personal files, broadcast it on social media or to screens. It works with any microscopy recording system and even if you just shoot the content manually.

Download the app now, register and get €10 credit for premium features that we release soon
